                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    US-08-466-860-51

Sequence 51, Application US/08466860

Patent No. 598552

GENERAL INFORMATION:
APPLICANT: HOWELL, WARK D.
APPLICANT: CARLO, DENNIS J.
TITLE OF INVENTION: VACCIMATION AND METHODS AGAINST DISEASES
TITLE OF INVENTION: PRESULTING FROM PATHOGENIC RESPONSES BY SPECIFIC T CELL
NUMBER OF SEQUENCES: 75
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   0.3%; Score 13.2; DB 1; Length 18; 83.3%; Pred. DESCRIPTION: HOB 1gF DNA primer generated from the 5 noncoding
DESCRIPTION: sequence of the human ob gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   US-08-765-626-29

Sequence 29, Application US/08765626

Patent No. 6071726

GENERAL INFORMATION:
APPLICANT: Visible Genetics Inc.
APPLICANT: Diamandis, Eleftherios
APPLICANT: Stevens, John K.
TITLE OF INVENTION: Method, Reagents and Kit for Diagnosis
TITLE OF INVENTION: and Targeted Screening for p53 Mutations
NUMBER OF SEQUENCES: 41
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Length 18;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Indels

```
US-08-472-040A-51

Sequence 51, Application US/08472040A

Sequence 51, Application US/08472040A

Sequence 51, Application US/08472040A

Patent No. 6090387

APPLICANT: HOWELL, MARK D.

APPLICANT: CARLO, DENNIS J.

TITLE OF INVENTION: VACCINATION AND METHODS AGAINST DISEASES

TITLE OF INVENTION: POPULATIONS

TITLE OF INVENTION: POPULATIONS

VINDER OF SEQUENCES: 77

CORRESPONDENCE ADDRESS:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CORDERSISE: CAMPBELLS:

TITLE OF INVENTION: MODULATORS OF BODY WEIGHT, CORRESPONDING
TITLE OF INVENTION: WUCLEIC ACIDS AND PROTEINS, AND DIAGNOSTIC AND THERAPEUTIC
TITLE OF INVENTION: USES THEREOF
NUMBER OF SEQUENCES: 98
CORRESPONDENCE ADDRESS:
ADDRESSEE: Klauber & Jackson
STREET: 411 Hackeneack Avenue
CITY: Hackeneack
STATE: New Jersey
COUWTRY: USA
ZIP: 07601
                                                                                                                                                                                                                                                                                                                                                                                     ö
                                                                                                                                                                                                                                                                                                                                                                                     Gaps

Patent No. 6403351

GENERAL INFORMATION:
APPLICANT: Sinskey, Anthony J.
APPLICANT: Lessard, Philip A.
APPLICANT: Willis, Laura B.
APPLICANT: Stephanopoulos, Gregory
TITLE OF INVENTION: Pyruvate Carboxylase from Corynebacterium glutamicum
FILE REFERENCE: 1533.0790000
CURRENT APPLICATION NUMBER: US/09/677,575
CURRENT APPLICATION NUMBER: 2000-10-03
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; OTHER INFORMATION: Description of Artificial Sequence: DNA Primer US-09-677-575-30

```
Sequence 29, Application US/0848825A
Patent No. 6471956
GENERAL INFORMATION:
APPLICANT: THE ROCKEFELLER UNIVERSITY
APPLICANT: THE ROCKEFELLER UNIVERSITY
TITLE OF INVENTION: MODULATORS OF BODY WEIGHT, CORRESPONDING
TITLE OF INVENTION: NUCLEIC ACIDS AND PROTEINS, AND DIAGNOSTIC AND THERAPEUTIC USES,
NUMBER OF SEQUENCES: 98
CORRESPONDENCE ADDRESS:
ADDRESSEE: Klauber & Jackson
STREET: 411 Hackensack Avenue
CITY: Hackensack
CITY: Hackensack
STRIE: New Jersey

Sequence 10, Application US/09622277

Patent No. 6521407

GENERAL INFORMATION:
GENERAL INFORMATION:
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: Warenius, Hilmar Meek
APPLICANT: Seabra, Laurence Anthony
TITLE OF INVENTION: METHODS FOR DETERMINING CHEMOSENSITIVITY OF CANCER CELLS BASED UPC
TITLE OF INVENTION: EXPRESSION OF NEGATIVE AND POSITIVE SIGNAL TRANSDUCTION FACTORS
FILE REFERENCE: 1417-188
CURRENT APPLICATION NUMBER: US/09/622,277
CURRENT FILING DATE: 2000-10-25
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | FACEULANY: NO. 50.30249.

Sequence 41, Application US/09393783A

Patent No. 6355428

GENERAL INFORMATION:

APPLICANT: Schroth, Gary P.

APPLICANT: Suh, Young J.

TITLE OF INVENTION: Nucleic Acid Ligand Interaction Assays

TITLE NEFRERNCE: 4600-0128.30

CURRENT FILING DATE: 1999-10-09

PRIOR PILING DATE: 1999-09-11

NUMBER OF SEQ ID NOS: 80

SOFTWARE: FastSEQ for Windows Version 3.0

LENGTH: 13

US-09-913-514-27/c

Sequence 27, Application US/09913514

Patent No. 6653069

GENERAL INFORMATION:
APPLICANT: GOMI, Yasuyuki
APPLICANT: SUNMARCHI, Hiroki
APPLICANT: SUNMARCHI, Michiaki
APPLICANT: YAMNUSHI, Koichi
TITLE OF INVENTION: Method for Quality Control of an Attenuated Varicella Live Vaccin
FILE REPERRENCE: 0216-0454P

CURRENT APPLICATION NUMBER: US/09/913,514

CURRENT PILING DATE: 2001-112-07

PRIOR PPLING DATE: 2001-01-31

PRIOR PLING DATE: 2000-01-31

PRIOR PLING DATE: 2000-01-31

PRIOR FILING DATE: 2000-01-31

WUMBER OF SEQ ID NOS: 42

Sequence 3647, Application US/09371772B

GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Bacobedo, Dam
APPLICANT: Stinchcomb, Dam
APPLICANT: Brobbedo, Jaime
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
CURRENT APPLICATION NUMBER: US/09/371,772B

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR PILING DATE: 1995-10-26

PRIOR PILING DATE: 1995-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: PatentIn version 3.0
